Workshop in Methods + CEWiT

Fall 2016 Python Workshop Series

Introduction to Using APIs with Python

NaLette Brodnax

Center of Excellence for Women in Technology

An application programming interface (API) is a tool that provides access to data or services. This workshop will introduce the use of APIs to obtain data from sources such as Survey Monkey, Twitter, or Data. gov. While familiarity with Python and/or R is helpful, no programming experience is necessary to attend this workshop.

This workshop is the third in a three-part series offered in collaboration between the Workshop in Methods and the Center of Excellence for Women in Technology. Join us for Introduction to Python (September 23) and Introduction to Web Scraping with Python (September 30). Visit http://go.iu.edu/wim for more details.
